—
The experience of directly making parts that are hidden, and the insistence on high-quality based on technology and system provide evidence of the quality that Bestuhl talks about.

Bestuhl loves people and space. We observe and research the environment and changes of our customers. We showcase only those products that passed through our quality-centered production process.

FOR EVERYWHERE

QUALITY

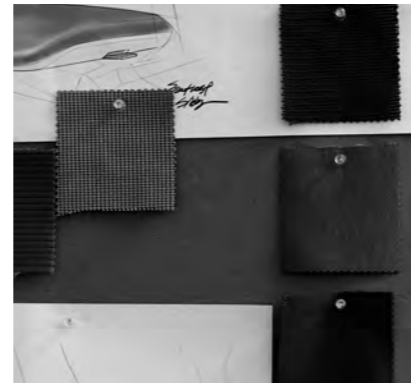

Bestuhl seeks practical designs that go together with the function of space. The design of people and space offers a new style, and functions as a solution that raises the roles and value of the space.

The designs showcased by Bestuhl go beyond visual beauty to communicate intimately with the essence of the space, to become a story that everyone can experience and share.

AWARDED 3 MAJOR WORLD DESIGN AWARDS

reddot award

FOR COMFORT

DESIGN

Bestuhl makes products based on our own technology, and instead of being satisfied with merely improving the overall quality, we showcase only those products that passed strict standards and specialized tests.

We passed global standards such as GREENGUARD, BIFMA, and EN 1335, and thus make products that conform to strict standards and competitiveness to go together with the world.

GREENGUARD

Eco-friendliness certification program of GEI of the U.S.

BIFMA

Test of the U.S. association of office furniture producers

EN 1335

Quality and safety standards of office furniture in Europe

US ERGO

Certified by US Ergonomics

DESK DESK 1600
 SCREEN SCREEN 1600
 STORAGE 1200MM LOWER CABINET / UPPER BOOKSHELF (ENCLOSED TYPE)

You can plan eco-friendly materials, simple designs and diverse storage so that the layout suits the occupational group and job types that are specialized and subdivided. We anticipate various office situations such as cooperation and concentrated tasks, and complete the workspace optimized to the work.

READY FOR NEW POSSIBILITY

PLAN FOR WORK STATION

CREATIVE WORK

It is suitable for tasks requiring group work, and when individual concentration and creative work results are needed. By actively utilizing items other than the desk, the independent workstation is emphasized, thus helping to improve job performance.

Recommended occupational groups
Architects, designers, programmers, etc.

FOCUSED WORK

For occupational groups with long individual work hours and high proportion of presence, one must flexibly respond to the work situation of high concentration and simplified consultations. Placement based on maintaining mutual distance while allowing open communication is desirable.

Recommended occupational groups
Planning jobs, public relations positions, general office work, etc.

MOBILE WORK

The workstation of those who frequently work away from the office involves work patterns that differ from stationary jobs, and it is important to respond on demand to communication situations. Job efficiency is emphasized by simple positioning that stresses mobility and autonomy.

Recommended occupational groups
Sales positions, distribution jobs, manufacturing jobs, etc.

DESK Standard Desk 1600
SCREEN Desk Screen 1600
STORAGE 1-Person Closet (Memo board) / 2-Tier Drawers

SEATING S10G110M
CABINET 3-Tier Open Cabinet / 3-Tier Cabinet

KEY FEATURES

SLIM SCREEN DESIGN

The screen, with its refined finish and thinness, blocks sideways views to ensure privacy and produces a modern, space effect.

2 IN 1 KEY SYSTEM

The door and drawers of the side combination cabinet are easily locked and opened with a single key, making maintenance easy.

DESK SLABS IN 3 COLORS

Depending on whether you want a calm atmosphere or a warm mood, the three colors can be chosen to fit the interior of the workspace.

DIAGONAL LEGS

With its simple feel, the diagonal leg design produces a feeling of openness in addition to an attractive exterior.

DESK

01

Aluminum die casting

The structure connects the entire frame in a smooth manner, completing a slim leg design and emphasizing a modern feeling.

01

02

02

Legs with adjustable height

The height can be adjusted by the user, and the adjustment controls are hidden from view to produce a neat exterior.

WIRE MANAGEMENT

01

Wire hanger

For the wiring of various devices, many wires can be used horizontally in a neat manner.

01

02

02

Opening and closing wiring cap

An amply-sized wiring hole allows the insertion of wire plugs, making wiring easy.

01

Magnetic wire clip

The magnetic wire clip is transparent so that it remains less visible on the desk legs, and the maintenance of wires becomes easy.

01

02

Built-in multiple tap (Side PC cabinet)

With the built-in multi-tap, according to the situation, many different machines can be used conveniently.

02

SCREEN

01

Lower-structure front cover

With a modern design, it combines with the mood of the space, protects privacy and straightens up the space.

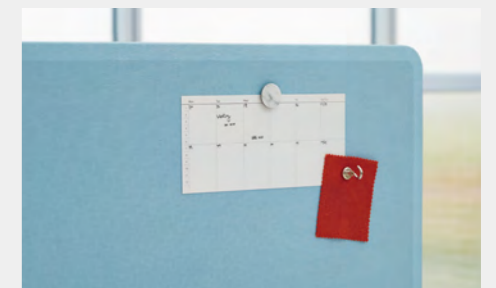

01

02

Screen for attaching memos

The screen allows the use of magnets so that memos, photos, etc. can be easily attached.

03

Diverse fabric colors

According to the mood of the space, the screen color can be selected to add vitality to the area making it ideal to use as a color point.

02
03

STORAGE 1

01

1-Person closet

The closet is used to store the outerwear of the person and with its mirror, storage space and other various features, the individual workspace is made much neater.

01

02

Steel side-plate closet

Together with its neat appearance, the steel panel on the sides of the closet allow the use of memos attached with magnets.

02

STORAGE 2

01

Caster to prevent overturning (2-Tier drawers)

The lower drawers allow the storage of many goods, and features casters which are designed to prevent overturning due to the added weight so that safe use is possible.

01

01

Multi-purpose storage

With the pan tray and storage space of various sizes, various items related to work can be stored and retrieved easily.

02

Simple movable drawers

The caster slides smoothly, and with the organization of the space, movement within the organization or other various circumstances, movement becomes simple.

01
02

03

Recessed aluminum handle

Without a protruded area, the recessed handle is finished to allow use in a variety of areas.

03

STORAGE 3

01

Open composite cabinet

It utilizes various storage structures so that objects of differing sizes can be easily stored and retrieved and the workspace can be economized.

01

02

Sliding door

A sliding-type door that can be moved in both directions. Setup can be made according to the storage and user convenience.

03

PC cabinet sliding door

The lower cabinet with its plentiful space and depth allows the storage of the PC, which can be accessed with a door to allow for a neat appearance.

The layout effect connected organically to the work type can be confirmed with the work efficiency. With the restrained design and utilitarian combination offered by FLIN, you can plan a variety of types of workstations optimized to the special work types.

FLIN

REALIZE YOUR WORKSPACE

PLAN FOR WORK STATION

COMMUNICATION TYPE

Based on the face-to-face structure, and the addition of the screen and storage items, it is a communicative layout that secures an independent workspace. At the same time while proceeding with individual work, it is ideal for occupational groups that involve agreement for quick work and the vitalizing of communication.

CONCENTRATION TYPE

For occupational groups that minimize business movement and require individual concentration over long periods, utilizing screens in various directions to block attention and noise is desirable. By adding various storage items, the workspace can be pleasantly arranged so that one can concentrate on work.

BENCH WORK TYPE

The bench work system can be flexibly applied to changes in the work environment, and one can plan various layouts according to the work type. By adding a variety of items, an efficient individual workspace can be composed, making it utilitarian.

DESK Standard Desk 1600
SCREEN Fabric Screen 1600
STORAGE Side Desk (Drawer type) / 1-Person Closet
SEATING J2G110L / Stool

KEY FEATURES

SIDE DESIGN POINTS

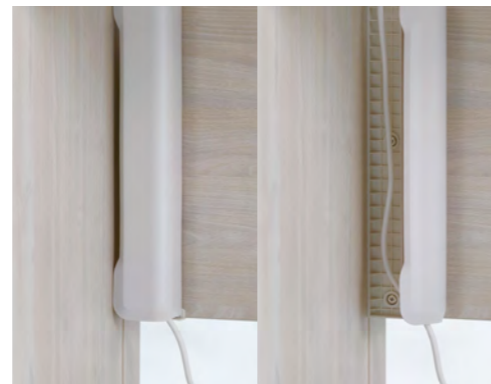

By adding simple details to the side of the desk, a refined feeling is achieved throughout the space.

OPENING & CLOSING VERTICAL WIRING DUCT

The slim, curved wiring cover does not expose wires, and permits opening and closing to easily organize the wiring. *Patent

SLIDING WIRING CAP

The wiring hole permits the passing of plugs, and wiring maintenance is easy with the sliding-open method. Inside the wiring cap, the wiring does not get tangled, ensuring easy wire maintenance. *Patent

DESK L Type Desk 1600

STORAGE 2-Tiered Movable Drawers
Cabinet with Side Door 600
1-Person Closet

DESK

01

Legs with adjustable height

With the horizontal adjusting lever, the desk's horizontal position is adjusted, allowing use on uneven floors.

01

02

Monitor shelf (Option)

By adjusting the height through optimization with the eye-level of the user, the resulting fatigue is reduced. By storing stationery in the lower spaces, the space is orderly arranged.

02

03

Pan tray drawers (Option)

One can store small stationery items in this tray. The monitor supporter and bookshelf can be added as lower-level options

03

WIRE MANAGEMENT

01

Wire hanger inside wiring cap

Because there is a wire hanger inside the wiring cap, various wires such as for cell-phone charger, IT devices, etc. do not get tangled, allowing for simple use.

01

02

2-Port USB (Option)

The USB port is built-in, allowing connection with various IT devices so that safe use is possible.

02

SCREEN

01

Wood screen

A versatile positioning of in front or on the sides is possible. By blocking distractions from surrounding people, the independence of the workspace is ensured.

01

02

Memo board (Option)

Attachment with magnets is possible, various memos can be easily fixed, and in the horizontal groove, a variety of accessories can be stored so that safe use is possible.

02

STORAGE 1

01

Caster to prevent overturning (2-Tier drawers)

The lower drawers allow the storage of many goods, and features casters which are designed to prevent overturning due to the added weight so that safe use is possible.

01

STORAGE 2

01

Utilizing various storage spaces

With various storage spaces of different sizes, small work items can be easily stored and retrieved so that safe use is possible.

01

01

45-Degrees handle with cutting finish (Door without handle)

The recessed handle allows for a neat finish, it is the buried handle. People can use the door without handles from various positions with ease.

01

02

Door with push-open method

By pressing lightly on the drawer, the Push-open method is applied to allow use in a variety of areas.

02

01

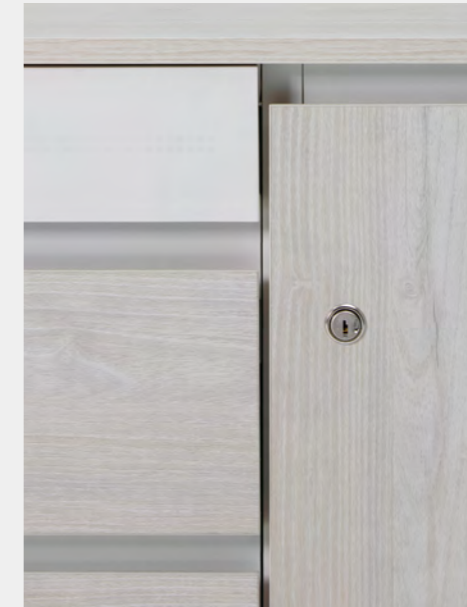

Locking system for 2 doors

The door and drawers are connected with a single locking system so that with one movement, they can be opened and locked. *Patent

02

Application of keycore with open/closed indicator

The front of the locking system, indicates the On / Off position, making use simple.

01

02

STORAGE 3

01

Movable cabinet

With the 4-directional movable casters, according to the situation, quick and easy positioning and changing is possible. Changes in the office such as location changes and organization of space can be flexibly dealt with.

01

02

Higher-level storage space of drawers

Because there is a tier of a certain height in the higher-levels, IT devices and other various work tools can be easily stored, and the efficient utilization of space is possible.

COLOR & MATERIAL

The slim INVENTO PARTITION is lightweight and one-touch assembly structure, making it easy for anyone to install and move in the space they need.

The panel frame, which is connected to mélange two-toned fabric, creates a space with minimal sensitivity.

INVENTO PARTITION

MINIMALIST SPACE DESIGN WITH FLEXIBLE ARRANGEMENT

KEY FEATURES

LIGHTWEIGHT PANEL

Size-reduced panel can be able to use space more efficiently. Consist workspace more easily by 30T lightweight panel when user needs installation or relocation.

SOFT FELT - FINISH

Soft felt material can absorb the noise-make a better space production and function.

ONE - TOUCH ASSEMBLY

With it one-touch connection system, there's no need extra tools to assemble or disassemble panels.

CABINET 5-TIER LOWER DOOR CABINET

The smart locker series provide a flexible office environment in a diverse work setting, efficiently storing both personal and shared items for employees.

JOIN

FOR SMART OFFICE ENVIRONMENTS

DESIGN

01

Hanger and Shelf

This hanger installed on the side of the locker allows you to hang and store clothes. The lower shelf makes it easy to store items such as suitcases and shoes.

01

02

Digital Door Lock

This touch-sensitive digital door lock allows you to secure the door with a 6-digit password, and its easy-to-update password feature makes it ideal for use in both shared spaces and private offices.

02

03

The Divider

This divider, which moves along a rail, allows users to organize their items neatly and efficiently.

03

ACCESSORY

01

Door Pocket

The door pocket, fixed on the inside of the door, allows for the storage of small items such as pens and notepads.

01

02

Business Card Holder (Option)

The business card holder allows you to display names by placing business cards on the front of each door.

02

03

Mobile Shelf and Tray (Option)

The mobile shelf allows for customizable storage space according to usage, while the soft-colored tray efficiently stores small items.

CABINET HANGER 400
KCL044EK / KCL084EK
4-TIER SHELF CABINET

Conference table ideal for spaces where a large number of people meet to solve a number of issues. The smooth curvatures and warm color of the top cancels out the harsh office environment, allowing for a free and active atmosphere of communication.

PHILO

VARIOUS PLANS OF CURVED DESIGN

KEY FEATURES

REFINED LOWER-LEVEL DESIGN

The center bar is situated so as to not interfere with the feet, and is organically connected to the lower leg to produce a restrained design.

WIRING MAINTENANCE SOLUTION

There is a space for organizing the wiring inside the leg frame, allowing neat maintenance of various wires. *Patent

FOOT WITH HEIGHT-ADJUSTMENTS

You can adjust the height according to convenience and even maintain horizontal balance on uneven floors. *Patent

CURVED DESIGN

Parting from the straight designs of existing office furniture, the curved leg design provides a warm and sensitive feeling, creating such a space.

DESIGN

01

Optional top

You can choose a refined, tapered top or a regular, neat top, depending on the use and space.

01

WIRE MANAGEMENT

01

Opening and closing duct cover

The push-open cover opens smoothly when lightly pressed. The convenient bi-directional cover makes wiring organization neat. *Patent

This versatile conference table features a smooth, rounded design and a variety of color combinations, making it perfect for meetings and collaboration in office, executive, and lobby spaces. The elegant design and simple wiring system create an effective and comfortable collaboration space.

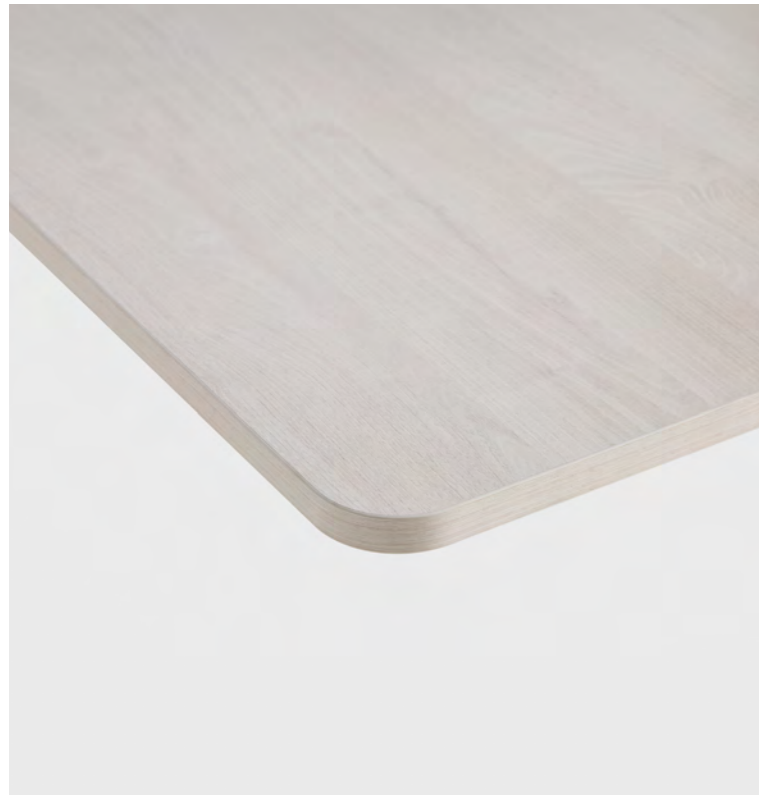

INVENTO CONVO

CREATING VARIOUS SPACES

KEY FEATURES

THE SMOOTH ROUND EDGES

The rounded edges of the tabletop ensure safety, while the smooth curves add a design highlight, creating a comfortable atmosphere.

THE LEVELING GLIDE

You can easily level your furniture by turning the base of the glides to accommodate uneven floors.

WIRE DUCT COVER

The wire duct cover ensures easy opening and closure, providing convenience when connecting various IT devices. When it is not used, you can simply close the cover to maintain cleanliness.

LOOP LEGS

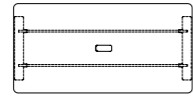

The rounded single frame leg designs create a warm and comfortable space.

CONFERENCE TABLE SIT016P
SEATING U85F400B

Table which you can configure efficiently depending on the purpose of the conference and the size of the space. Completed with a solid material and simple design, the refined conference space is elevated one level.

CAT 10

CONNECT TO VARIOUS OPINIONS

KEY FEATURES

TOP WITH 2-TONE EDGE

The 2-tone edge at the sides of the top creates a point of refinement, producing a sensitive spacial effect.

AL DIE CASTING LEGS

The cool sense of openness of the legs allows for connection and extension with outstanding durability, resulting in safe use.

CONFERENCE TABLE CCT018P
SEATING U40F100C

DESIGN

01

Angle-adjusted glide

The ball-type glide rotates, and no matter the surface, the attachment to the floor is strong and stable.

01

02

Solid legs (Round table)

The lower legs of the round-type table supports the top with stability, and can be positioned in narrow spaces for an efficient arrangement.

02

WIRE MANAGEMENT

01

Opening and closing wiring duct system

The wiring duct inserted in the middle of the table is an opening and closing type where the arrangement of the wiring is easy to organize, and various IT devices can be easily connected.

The curved design and the combination of various colors form harmony into any space, whether it is a cafeteria, lounge, or casual meeting room, creating a comfortable and warm atmosphere.

HEYWORK TABLE

FLEXIBLE LAYOUT CHANGES

KEY FEATURES

SLEEK AND FUNCTIONAL LOWER LEGS

The round, seamlessly connected lower legs are designed with functional design points on each side, allowing them to double as hangers, combining both practicality and style. The Heywork table helps create a casual and stylish atmosphere in office spaces.

MOVABLE STANDING TABLE

Equipped with casters, the table can be moved and arranged freely according to the space and environment.

WIRE DUCT COVER

The wire duct cover ensures easy opening and closure, providing convenience when connecting various IT devices. When it is not used, you can simply close the cover to maintain cleanliness.

**EDU.
LECTURE**

The free expansion of the bookshelves, the reading tables' simple structures and the book truck's convenient use goes beyond the convenience of each to combine into a library that anybody wants to visit. An efficient storage and maintenance of books, a convenient perusing of materials and other functions can be concentrated on.

LIBRO SHELVING

NEWLY CHANGED CONCENTRATION WAY

KEY FEATURES

CONNECTION STRUCTURE OF POST

The durable post is made of aluminum, preventing shaking. The exposure of the rack bracket hole has been minimized to give off an accent to the neat and refined appearance.

SIGN BOARD (OPTION)

Without further manufacture, it can be built into the post, and list paper can be replaced with ease. * Composite specification applied

BOOK ENDS (OPTION)

Books can be prevented from falling when moved into the desired place. Even when books tilt, the book ends do not get pushed, making neat storage possible.

SHELVING 6-Tiered Composite Bookshelf

SHELVING

01

Steel rack

The racks in their entirety are finished in a diagonal angle, making them not only sensitive, but preventing the forward falling and twisting effect due to vertical weight force, and safe use is possible.

01

02

02

Rack with perforated brackets

The rack bracket can be perforated for simple RFID (radio frequency identification) use.

01

Rack name-tag (Option)

Movement and detaching / attaching is simple, and a variety of types of books can be easily classified.

01

02

02

Glide with height adjustments

With simple adjustments, the surface and horizontal position can be suitably matched.

01

Magazine shelf (Option)

If you raise the exhibition stand, the interior storage becomes plentiful and during storage, it does not close by itself, helping to use it with ease.

01

BOOK TROLLEY

01

Urethane caster

The urethane material minimizes noise, and the stopper system is applied during frequent movements, allowing for safe use.

02

Steel rack

To move a large number of books in a stable manner, the racks are tilted slightly, so that books can be managed with ease.

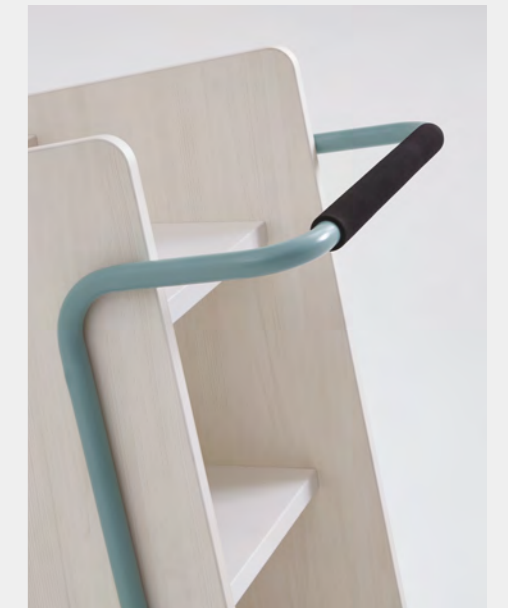

01

02

03

Single-piece handles

To the bending pipe handles are added, finishing with sponges, so a smooth and comfortable feel is presented.

SHELVING 6-Tiered Composite Bookshelf
BOOK TROLLEY Book Trolley

The reading table with its simple structure has secured ample space for working, and provides the environment for concentrating. With the addition of various functions such as partitions, lighting and electrical sockets, a variety of activities such as learning, reading, etc. are supported.

LIBRO TABLE

TIME TO CREATE YOUR OWN IDEAS

KEY FEATURES

READING TABLE - CONNECTING STRUCTURE

2 types, independent and connection types, can be operated. In conformity with the size of the space, the reading table can be freely connected and installed.

READING TABLE - EXPOSED DIAGONAL LEGS

The diagonal legs produce a cool sense of freedom, and durable due to its AL pressing-out profile. It connects to the groove in this method, and without bolts, the exterior is neat.

2-TONE COLOR TOP

The top color can be selected to match the mood of the space. The point of the top is the white color in the center, and a smooth atmosphere is produced in combination.

PC SEARCH DESK - CURVED DESIGN

The smoothly connecting curved design emphasizes simple sensitivities, and the space is produced with refinement.

LIBRARY TABLE

01

Glider with height adjustments

The height is adjusted according to the convenience, and the glider uses an unexposed adjusting method, completing a neat appearance.

01

02

Partition

By unifying with the top in terms of the material and color, a warm feeling is produced, side attention is blocked, concentration is raised, and privacy is protected.

02

01

Buried socket - partition type

The socket is neatly buried, and in each seat, connection with a device is convenient, and can be freely used in the seat.

* 1 Opening / 2-Port USB

01

02

Buried socket - open-type

When connecting with a device, the socket is buried so that easy use is possible.

* 2 Opening / 2-Port USB

02

01

Touch lighting

The ON / OFF button on the top is used, and the lighting can be used with ease.

01

02

Open-type reading table lights

The T type lighting made of durable steel materials gives off a remarkable appearance.

A comfortable studying environment is created by the evenly distributed light.

02

01

Adjustable brightness of light

With a touch-switch, the LED light is installed in each seat, and according to individual circumstances, a 3-step brightness can be controlled and used.

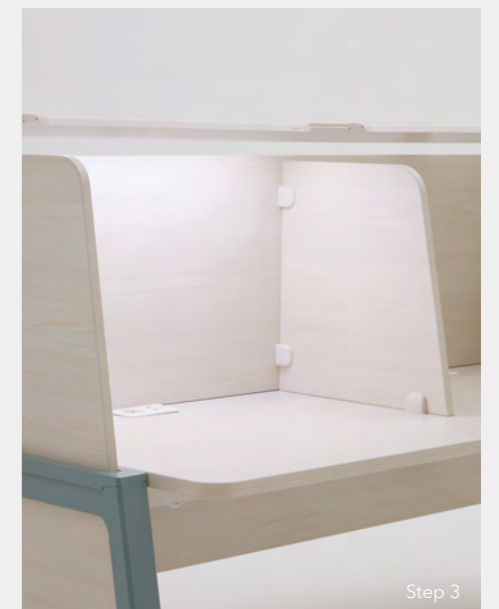

* Partition type / open-type are the same

Step 1

Step 2

Step 3

SEARCH TABLE

01

Screen

By blocking the space, privacy is protected. The smooth fabric produces a warm atmosphere.

01

02

Exposed terminal

When connecting with a multi-media device, the USB and earphone are installed in 2 specifications, making use convenient.

02

03

Wiring duct box

The wiring duct is in the lower-level PC storage box, stored, and the wirings are allowed a neat appearance.

03

01

Monitor overturning prevention

Fixed steel support prevents the overturning or theft of the monitor, making for safe use.

02

Wiring cap

Exposed wires of connected devices can be neatly organized, maintaining the exterior appearance.

01

02

03

Coverboard for the prevention of PC overturning

Durability of the aluminum coverboard prevents the overturning of the PC, making safe use possible.

03

01

PC storage box locking system

A door is provided to conveniently store the PC and with the locking system, security is strengthened.

01

02

PC storage box air vent

Minus-shaped air vent in the back of the storage box, prevents the PC from overheating.

02

03

Wireless charger (Option)

IT devices are wirelessly charged easily.

03

01

Prevent sagging of the top bracket

Being connected with steel brackets, the top of the search desk does not give way even after prolonged use, making it safe.

* Applied the standing-type PC search desk

01

02

Prevent overturning

This prevents the possibility of overturning when the user moves the center of gravity forward.

* Applied the standing-type PC search desk

02

Hanging the space through design, LAY.
 With simple design, the individual space is efficiently secured through LAY.
 Diverse forms of spaces can be planned and quickly arranged, for convenience.

LAY

EASY PLANNING FOR ANY PURPOSE

PLAN FOR YOUR SPACE

CONCENTRATION SPACE

The space of concentration allows planned results

In the shared office, education and lecture spaces, the efficient composition based on the right number of people is required. With simple design, the individual concentration space needs to be secured, and with the right amount of space in between, a relaxed arrangement is necessary.

CREATIVE SPACE

Creative space with the free flow of ideas
With its light weight, movement is easy, and a variety of layouts can be quickly completed. The group can be made according to the communication situation, and material search, exchange of opinions and other smooth communication can be conducted.

MEETING SPACE

Simple meeting area that saves space

By easily stationing anywhere in the space and utilizing small-scale meeting areas, death space can be reduced. Taking up little space, on-demand activities such as short meetings and counseling is good with the space.

KEY FEATURES

FACE-TO-FACE COMBINATIONS

Asymmetrical hoods to the left and right can be used, so that the table can in face-to-face style be easily connected.

*patent

PEN TRAY

Pen tray composed with ample depth and width. Through the furrows on the sides, foreign materials can be neatly eliminated.

ROUNDED EDGE

With the smoothly-connecting rounding finish, it can be with safety used, and by emphasizing a restrained feelings, a refined atmosphere is produced.

TRAINING TABLES CLT006D
SEATING U60F100G

DESIGN & FUNCTION

01

Cover board

The lower-level front cover board is remarkable for its 2-tone color, and privacy is protected and the open space is neatly organized.

02

Nails

The felt is attached in the plastic nail, and when moving, noise and floor scratches are prevented.

01

02

01

Expansion-type drawers

The storage space can be flexibly expanded so that objects can be amply stored. After storage, the space is automatically reduced so that bodily contact is prevented.

*Patent

01

01

Vertical stacking

Up to 4~5 can be stacked vertically, saving space.

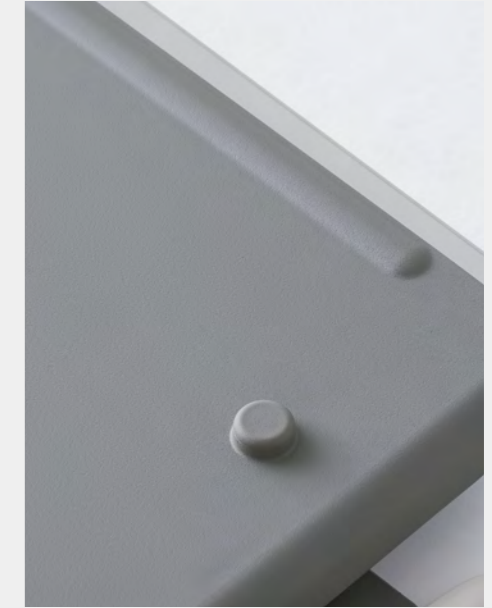

02

Shock-resistant pad

When stacking the lower-level pads, shock and scratches are prevented.

01

02

01

Bag hanger straight-type combination

On the sides are installed the asymmetrical hook-type bag hanger, and the bag is stored. What's more, by combining with a table, the straight-type layout can be completed.

*Patent

TRAINING TABLES CLT006D
SEATING U30F411G

It is a folding table that points to changes in the office environment and usability. F.A.T10 responds to the frequent occurrence of conferences, cooperations, education and other various situations, responding to them effectively. Moreover, the user can use mobile devices, tools, etc. in the emphasizing of details, and convenient use by anybody was designed.

F.A.T 10

NEW PLAN TO EXPRESS OUR OPINIONS

PLAN FOR YOUR SPACE

COLLABORATION

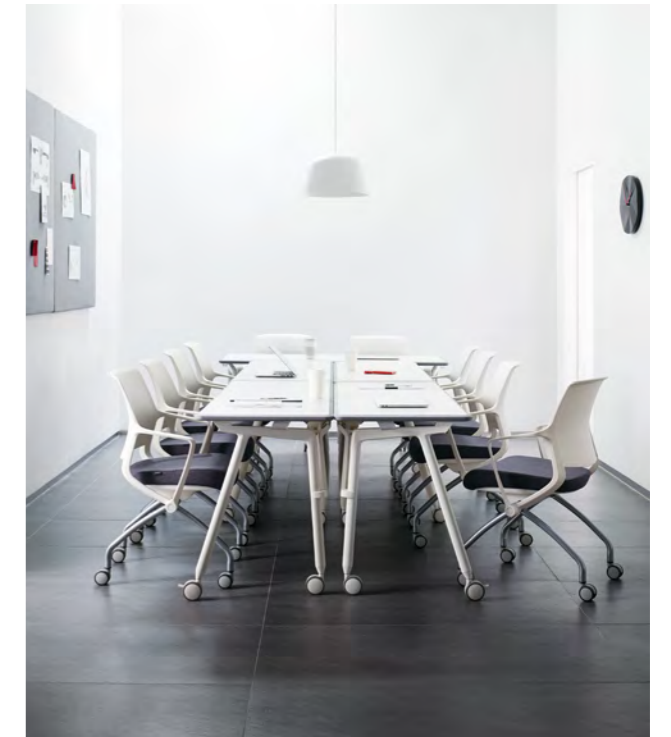

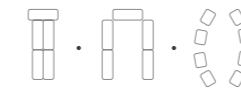

Cooperation destroys the fixed boundaries of work and is the starting point for the finding of vitality from variety. The collaborative space can start from a free atmosphere and communication based on simple arrangements, and various layouts can be planned in conformity to the people participating in projects and the space size.

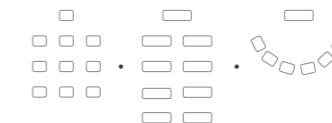

CONFERENCE

The meeting space is an area where people with different experiences and knowledge can converge to share ideas.

The independent meeting space blocks out the surroundings and noise and according to the job characteristics and those in attendance, can be planned in various scales, to be used for meetings, conferences, projects, etc.

TRAINING

In the education space, on-demand educational and group activities can be responded to, making possible easy movement and rearrangement, and various layouts are showcased. Seminars, lectures, learning and other various purposes can be met, and to allow the concentration of many people at once, arrangement must be planned with the size in mind.

KEY FEATURES

FOLDING SYSTEM

The wire system is an intuitive folding system, and the center-type has it located in the middle, allowing for easy use by anybody.

* Patent

OPENING AND CLOSING OF ENTIRE DUCT

Multi-taps and wires can be stored neatly in the duct and the use of notebook computers and IT devices becomes convenient.

FOLDING DRAWERS

The folding drawers provide storage space, and with its easy usability, objects can be stored with ease.

* Patent

DIAGONAL LEGS

The neatly-extended diagonal design of the legs can in whatever the space make simple design stand out.

DESIGN & FUNCTION

01

Lower-structure front cover

The 2-tone lower-level front cover protects privacy making the open space much neater.

01

01

Horizontal stacking

With the handy folding method, horizontal stacking is made possible, resulting in improved space efficiency and easy movement and storage.

01

02

Wiring system

When making face-to-face layout, between the tables the cables pass without damage to connect with the top, allowing for neat wiring organization.

02

01

Optional top

Between the top with the neat design and the easy-usability providing top with urethane edges, one can choose between the two.

01

01

Bag hanger

Hangers easily store the user's bags.

01

02

IT device stands

Cell phones, pad-type IT devices, and writing utensils can be docked with the stand, and being a folding type, when folded during stacking, interference is minimized.

* Option

03

Caster/Glide

Move easily with casters and fix easily with glide legs.

LECTURE TABLE CRT072D

With its easy folding and movement, various situations such as learning, lectures, etc. can be responded to and arranged with speed.

With its compact size, space efficiency is outstanding, and an independent separate space is secured, making concentration possible.

M-TABLET

THE START OF FUNCTIONAL DESIGN

KEY FEATURES

1-TOUCH FOLDING SYSTEM

The intuitive 1-touch method can respond quickly to various situations. It can be easily folded, allowing for easy use.

* Patent

EXPANDABLE TOP

The ample space allows for books, notebook computers, objects, etc. to be freely used.

Size : W420 X D300

CRADLE FOR MOBILE DEVICES / CUP HOLDER (OPTION)

A stand attached in the front can handily hold mobile devices, and used effectively in education and lectures. Drinks can be with stability stored in a separate holder, and the workspace is allowed a neat appearance.

HORIZONTAL STACKING

By folding easily, horizontal stacking is possible so that the space is at once more spacious and efficiently used.

Even the same space through the autonomy of arrangement can be created anew.
 The plot offers the optimal 1-person seat with convenient structure and mobility,
 and by maintenance of individual distance, a space for smooth communication can be planned.

PLOT STUDY

CREATED THEME, INFINITELY CHANGEABLE

PLAN FOR YOUR SPACE

LAYOUT FOR TEAMWORK

To solve a common objective together, the people are classified and teamwork is induced by the layout. It is good for planning efficiently according to the size, and because mobility is easy, arrangement can be quickly changed, making it convenient.

LAYOUT FOR EDUCATION

An 1-person seat that was designed with utility in mind, a large number of people can participate, and an educational space of varying sizes can be planned. The space between individual seats are maintained in this layout, and an environment for concentrating is provided.

KEY FEATURES

LOWER-LEVEL TRAY_PATTERN PERFORATIONS

The lower-level tray features pattern perforations, and by lightly sweeping away dust and contaminants, it is pleasant. Without a separate storage space, objects can be easily stored.
* Patent

STEEL FRAME FOOTREST

Durable steel frame allows for safe long-period use.

1-TOUCH FOLDING SYSTEM

An intuitive 1-touch method, in a variety of situations, speedy response is possible. Anybody can easily fold it, to allow use in a variety of areas.
* Patent

SENSITIVE COLOR

In fitting with a variety of space concepts, the cell and frame's color and finishing fabric can be selected, and the interior's level of completion can be raised.

LOCKER

CONVENIENT STORAGE, SAFETY DESIGN

The present learning environment is characterized by the increase in moving classes, and in order for the students to effectively carry out the programs, the convenient use of various replacement and learning tools in the individual space is provided.

1-piece type handle with locking system

When the door is closed, the locked position is maintained, and the door is opened only when the lever is pulled in this locking system, and with this application, objects are safely stored and the door opens and shuts with ease.

01

Door hinge system

The steel structure door hinges allow rotation to a maximum of 270 degrees for ease of use.

01

02

Internal ventilation function

The air circulation inside the storage is helped, and the ventilation part is applied to maintain pleasant surroundings.

With sensitive lines and luxurious texture, the executive chair stresses refined taste. It can produce spaces with refined taste and sense of gravity with the executive spaces and grand conference room.

HONOR

MOVE TO A NEW POSITION

KEY FEATURES

HIGH-BACK / MID-BACK

Composed of two specifications, you can choose the right one for the club lounge, seminar room, dining room, parlor, etc. according to the purpose.

AL DIE CASTING ARMREST

The armrest with its flowing design connects with the back-rest and with the addition of leather to the aluminum die cast, the luxurious and solid appearance is complete.

HIGHEST-QUALITY LEATHER

The parts that come into contact with the body have been finished in fine, natural leather, providing a soft, comfortable feeling even after long periods of sitting.

*Combined specifications

FLOWING LINES

The lines connect the entire chair elegantly, surrounding the user's sitting position and providing differential convenience.

EXECUTIVE B10NB180L

We introduce a new ergonomic chair designed to adapt to changing office environments and user activities. The chair features a 3D MOTION function that responds to the user's movements, along with customizable settings that support various postures, helping to foster a healthier office work environment.

ROLY

FOLLOW YOUR MOVE, FOLLOW ROLY

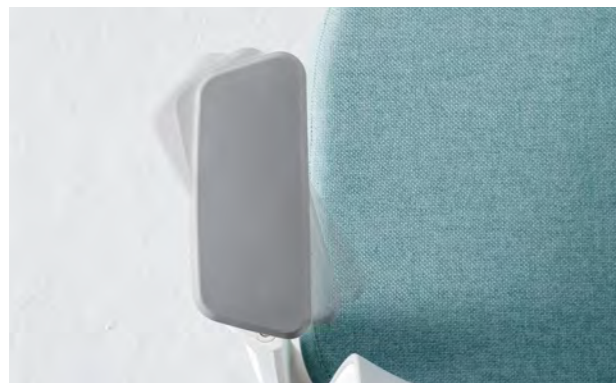

KEY FEATURES

FLEXIBLE LUMBAR SUPPORT

The 4D pivot and flexible lumbar pad provide comfortable support for the lower back, adapting to my movements.
*Height Adjustment (60 mm) / Depth Adjustment (10 mm)

4D MOVING ARMREST

It supports your best posture while using mobile devices through height and depth adjustment as well as the dual rotation function.

USER-CONVENIENT WIRING SYSTEM

The buttons embedded with a wire system are found under the seat, ensuring user convenience.
The pictogram on the buttons allows easy recognition.

KINETIC WEIGHT-RESPONSIVE TILTING MECHANISM

The tilt mechanism of the Roly automatically adjusts the backrest tilt strength according to the user's weight, ensuring comfort without the need for manual adjustments. It also features a 3-level adjustable tilt lock, allowing you to customize the seating position for maximum comfort.

KINECTING MOVING

The backrest moves fluidly with the user, twisting sideways and forward to help reduce fatigue during extended periods of sitting.

Your position is improved through the ergonomic curve design.
Optimal convenience is maintained through the function that responds flexibly to the user's various movements and custom-fit adjustments.

S10N

A COMFORTABLE LIFE IN SHAPE

KEY FEATURES

1-TOUCH ADJUSTABLE LUMBAR SUPPORT (PAD TYPE)

With a single operation, the lumbar support height and depth adjust so that the optimal waist support of the user becomes possible.

1-TOUCH SEAT BOARD DETACHING AND ATTACHING FUNCTION

When the seat board becomes dirty or the color changes, it can be simply detached and attached for hygienic use.

ANGLE / DEPTH OF SEAT BOARD

By adjusting the angle with the side seat-board lever, the vertebral distortion and pressure of the femoral region can be reduced. By adjusting the depth of the seat board, a more comfortable position can be maintained.

TASK S10NG110L

With outstanding elasticity and air permeability, the composition of mesh materials provide a pleasant environment. Even in seat boards without frames, the mesh material was added with elasticity adjustments to allow for a flexible response to the user's movements.

S15

USEFUL VALUE OF GOOD MATERIAL

KEY FEATURES

COOLING FAN

User can enjoy the breeze blowing from under the seat, by turning on / off the switch left below the seat.

* Option: Windy spec

ELASTICITY ADJUSTMENT DEVICE OF SEAT BOARD

To fit the position and preferences of the user, the mesh elasticity is adjusted and the pressure on the seat board is controlled to maintain optimized convenience.

DEPTH / ANGLE ADJUSTMENT OF SEAT BOARD

If the angle is adjusted with the side seat-board lever, the vertebral distortion and pressure of the femoral region can be reduced.

If the depth of the seat board is adjusted, a more comfortable position can be maintained.

TASK S15G110L

USE YOUR TIME COMFORTABLY

The maintenance of a proper and comfortable position is directly related to work performance. By supporting the sitting position, the user can experience comfort from the custom-fit of the lumbar support and the seat board.

Adjustable lumbar support (pad type)

The pad type is effective for the support of the waist, and by adjusting the height and depth at the same time, offers the gift of comfort to fit the user's shape.

BLACK FRAME - Changed to BLACK
WHITE FRAME - Changed to GRAY

01

High-density sponge / Detaching

The high-density sponge with excellent elasticity and restoring force provides the highest degree of comfort.

02

Selectable tilt-adjustment device

The tilt height can be controlled according to user's position and shape with the regular type, or the tilt degree can be together controlled with the high-quality type, depending on the selection.

TASK S29M110L

By emphasizing the color of the chair, the simple design provides a differentiated effect of space. You can find your ideal position with the various functions that fit the shape and position of the user.

**J2**

VARIOUS COLORED COMFORTABILITY

KEY FEATURES

BUILT-IN LUMBAR SUPPORT

The lumbar support is built into the soft, sponge-type backrest, so that the height and depth can be controlled at the same time.

DEPTH ADJUSTMENT OF SEAT BOARD

Using the side lever of the seat board, according to the user's shape, the depth of the seat board can be adjusted.

MULTI-LOCKING

When pushing the backrest back, by using the handle below the seat board, the backrest can be fixed in the desired position.

TASK J27E110L

M1

THE BEGINNING OF A NEW FORM

The M1 chair offers an exceptional seating experience with its weight-responsive tilt, which automatically adjusts the resistance to the user's weight, and its lumbar support that can be adjusted using dual levers. The elegant, curved single unit chair beautifully enhances your space.

Auto-Adjusting Tilting Mechanism

The weight-responsive tilt automatically adjusts the tilt resistance based on the user's weight. The tilting angle can be adjusted in 4-stage, allowing you to set it according to your work mode.

01

Lumbar Adjustment

The backrest pad can be moved vertically to adjust the height, while the lumbar levers on both sides allow for 3-stage depth adjustment in both left and right directions.

* Height Adjustment (40 mm) /
Depth Adjustment (10 mm)

02

Seat Depth Adjustment

The seat depth can be adjusted through the button at the lower right corner. (50 mm)

* Available only with
lumbar support option.

S35

DESIGNED ANGLE FOR RELAXED POSE

The backrest and seat are made with elastomer mesh for excellent breathability. Designed with only the essential features for office environments, it ensures optimal seating comfort and a pleasant experience in various spaces.

High-Elasticity Elastomer Mesh Backrest and Seat Cushion

The high-elastic mesh material used for both the backrest and seat cushion provides comfort during long periods of sitting and adapts flexibly to the user's movements.

Lumbar Height Adjustment

The round, mesh lumbar support reduces pressure and can be adjusted for height, helping users of different body types maintain a comfortable posture.

Open-Type Seat Frame

The mesh seat frame with double stitching prevents sagging and provides excellent resilience, even after long periods of use.

Multi-Point Locking Tilt

The tilting system, where the backrest and seat move at different angles, allows the tilt to be locked, accommodating the user's posture and body type. (G Model Only)

The simple design is noteworthy, and the flexible curves help support the seated body. Not only work, but education, group activities, learning and other various purposes can be met, making it utilitarian.

E20

PERSONAL COMFORT FOR THEM

KEY FEATURES

SYNCHRONIZED TILT

This tilt moves the backrest / seat board in different angles to each other, and the intensity and desired location of tilting can be locked together.

ADJUSTABLE ARMREST

According to the user's body shape and position, the height can be adjusted, making use easy.

FIXED ARMREST

Backed up ergonomic data, the location and angle is set to provide the optimal convenience.

ADJUSTABLE LUMBAR SUPPORT

By moving the lever behind the backrest up and down, the mesh elasticity of the backrest can be controlled, allowing for the user's body shape to be optimally maintained.

MULTI-USE E20E210

E1

NEW CHANGES BY SIMPLICITY

The balance between the practical functions and beautiful design help make for novelty in everyday life. You can experience a comfortable environment with the selected materials, which offer pleasant moods, and convenient functions.

Backrest mesh

The mesh material of the backrest shows excellent elasticity, preventing sagging even after use for long hours.

01

Back tilt

The backrest is tilted backwards allowing for comfortable rest by leaning backwards, making working for long hours easier.

01

02

Fixed armrest

The fixed plastic armrest is based on ergonomic data, and the location and angle are set up so that anyone can use it with ease.

MULTI-USE E1E110

It is good to use for matching the various purposes and moods of the space. The backrest with its strong elasticity supports the body position with stability, and the soft seat board helps maintain comfort without pressure.

U17

SIMPLE SOLUTION FOR SITUATION

KEY FEATURES

TORSION BAR TILTING

When the body is bent in one way, the backrest and the 1-piece armrest through the torsion bar's flexible elasticity allow for smooth and convenient tilting.

FOLDABLE SEAT BOARD

Specifications other than the rotation type allow the seat board to be vertically folded to allow for folding while standing, making storage simple.

SWIVEL TYPE (OPTION)

The casters are made of urethane to minimize scratches to the floor, and when rotating or moving, they can be used smoothly.

SEMI-TRANSPARENT LUMBAR SUPPORT

Excellent elasticity is apparent in the flexible PU material, and the different body movements of the user are supported.

COLOR & MATERIAL

The active communication environment depends on the feeling of the space.
The cheerful colors, simple design, and flexible meeting of tensions create
the effect of a casual communicational space.

U15

MORE FLEXIBLE MOVEMENT

KEY FEATURES

TWISTABLE BACKREST

When leaning the body or moving, the entire backrest twists from left to right. It adds comfort by responding flexibly to the user's movements.

FOLDABLE SEAT BOARD

The seat board can be vertically folded to allow for horizontal storage. The volume is minimized so that efficient storage and maintenance is possible.

TORSION BAR TILTING

When tilting the body using the torsion bar, the backrest tilts at the same time. The armrest and mesh elasticity works at the same time to allow smooth tilting sensations.

MULTI-USE U50F100CP

With bright colors and design, different spaces can be designed in different ways. The backrest is remarkable with perforated patterns, and with the outstanding air permeability read by eyesight, it completes the workspace with refinement and pleasantness.

U55

PASSIONATE MOMENTS IN EVERYWHERE

KEY FEATURES

ARCHED BACKREST

With the flexible curved design, many different body shapes and frequent movements can be supported with stability. The perforated pattern elevates the pleasant environment one level.

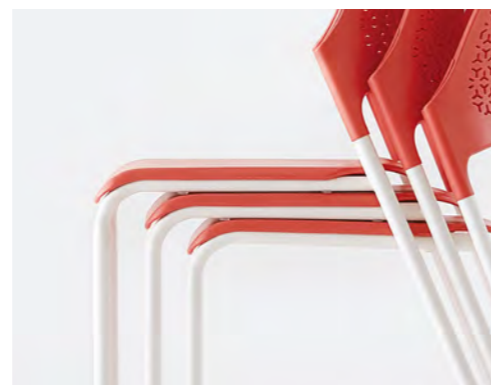

1-PIECE ARMREST

You can choose to have an armrest based on your preference. The 1-piece armrest is naturally connected with the backrest, and permits the elbows to be supported in a comfortable body position.

* Patent

VERTICAL STACKING

The vertical stacking allows for neat organization and makes movement and storage simple. By stacking vertically, the storage volume can be reduced and the efficient management of space becomes possible.

BE TOGETHER ANYWHERE

This multipurpose chair features a unified, streamlined design and a sophisticated color, making it perfect for a variety of spaces. The horizontal stacking feature makes storage easy and enhances space efficiency.

Flexible Design Handle

The perforated handle design on the front of the backrest makes it easy to use when moving and blends harmoniously with the three-dimensional shape of the backrest.

01

Horizontal Stacking

By simply folding and stacking this chair horizontally, storage space can be saved, allowing for convenient transport to the desired location.

01

02

Ball Casters

The integrated smooth ball casters allow for quiet movement without damaging the floor and securely lock in place when seated.

MAKE YOUR SPACES MORE BEAUTIFUL

This multipurpose chair features a soft chamfered backrest and vibrant coloring, making it a perfect fit for any space. The vertical stacking feature makes storage easy and enhances space efficiency.

Backrest Curved Edge Design

The curved edges along the side lines of the backrest create a rich, three-dimensional effect and a soft image, contributing to a unified design for a stable and cohesive appearance.

01

Vertical Stacking

The vertical stacking feature allows for easy mobility and storage, reducing volume and enabling efficient space management.

01

02

Seat Cover

The removable seat cover can be easily replaced if stained and offers a selection of six colors for versatile styling options.

PLOT 4-LEG

FOLLOW THE STYLISH ATMOSPHERE

Redefined lines add a modern feel to the space. You can achieve a special space to inspire you simply with a new arrangement.

Integrated Armrest

The integrated armrest with pads supports the sitting position and the arms with stability and comfort.

01

Vertical stacking_undercover

The 4-leg type can be vertically stacked, and storage is made easy. The lower-level undercover, when stacking vertically, prevents any squashing that may occur.

02

Rotational type felt glide

Unaffected by the floor conditions, the rotation-type glider allows for stable installation, and when moving on the felt material, noise and scratches to the floor are prevented.

With just one sensitive design, changes to the space begin. With fresh colors and diverse leg styles, the mood of the space can be effectively produced.

U30

MODERN TOUCHES OF TEXTURE

KEY FEATURES

SELF-TENSION BACKREST

By flexibly responding to the different body shapes and movements of users, even in different situations, optimal comfort is maintained.

LOWER-LEVEL LINEUP

Depending on the mood of the space or preference, you can choose among the, 4-leg, sled and rotation types.

ROTATIONAL TYPE FELT GLIDE

The rotational type glide is not significantly influenced by the surface type, making stable installation possible. Scratches to the floor are prevented when moving on the floor.

ALL-IN-ONE SHELL

The backrest/seat board is composed of a single unit. It is movable according to the various body positions of the user, offering the best sitting comfort.

I like to spend time on a bestuhl chair.
While sitting comfortably, I realize the possibility ideas
and the possibility of their realization.
I am immersed in the purpose of achieving successful results.
Anytime you work for bestuhl, you are surrounded by this ethic
Again, once more, I will write their greatest story.

be the best, bestuhl
